

Practice History and Experience

Daniel Hurd Associates was formed in 1994.

The Practice is progressive and award-winning, providing a wide range of expertise in architectural, conservation, master planning, interior design, and Health and Safety Coordinators services.

We work in all sectors, but have particular expertise in delivering individual and imaginative buildings in ecclesiastical, health, residential, and social sectors.

We also have a great deal of experience working with listed buildings and on a wide variety of conservation projects.

Location

Our new purpose built offices are located in the heart of Birmingham's Jewellery Quarter close to the City Centre.

Practice Philosophy

Central to our philosophy is the principle of 'inclusive design', which seeks to create environments that embrace and invite the widest possible range of users in imaginative and innovative ways.

We have a strong sensitivity to context and tradition, but combine this with a creative and modern approach. Accordingly, we work with both traditional constructional methods and the latest technologies.

Relationships

Our success comes from our emphasis and commitment to establish an effective and responsive working relationship with our clients and their customers/stakeholders.

Office Interior
